

Creating A Dialer On Windows Vista

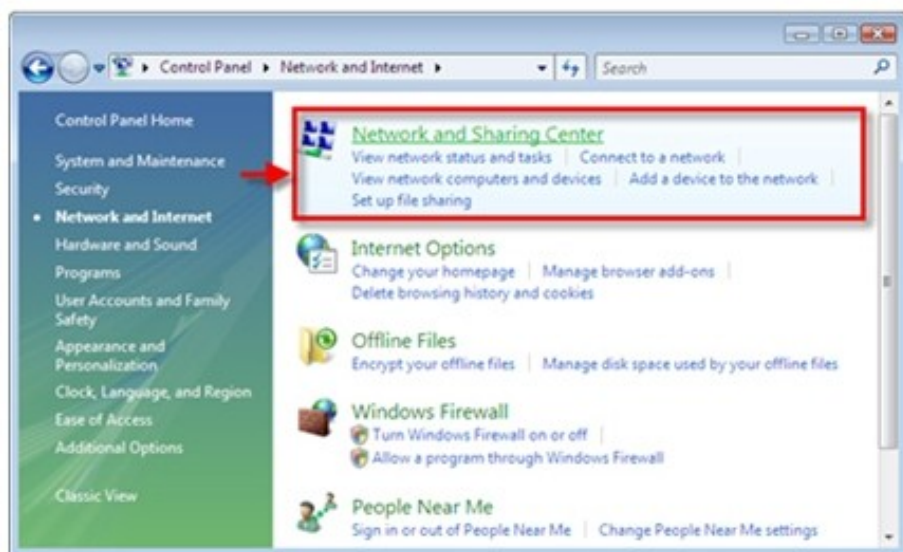

1. Click Start -> Control Panel.

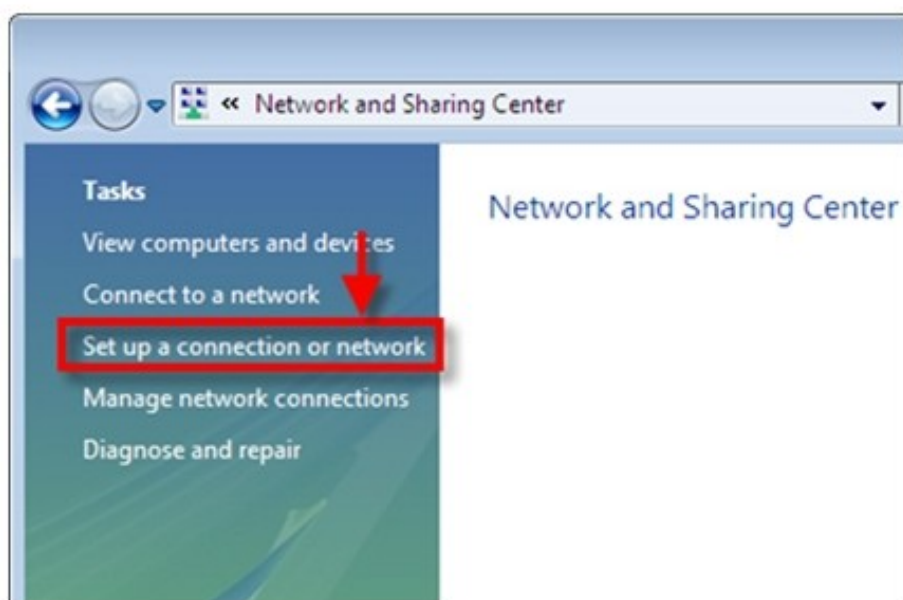

2. Click on Network and Internet icon.

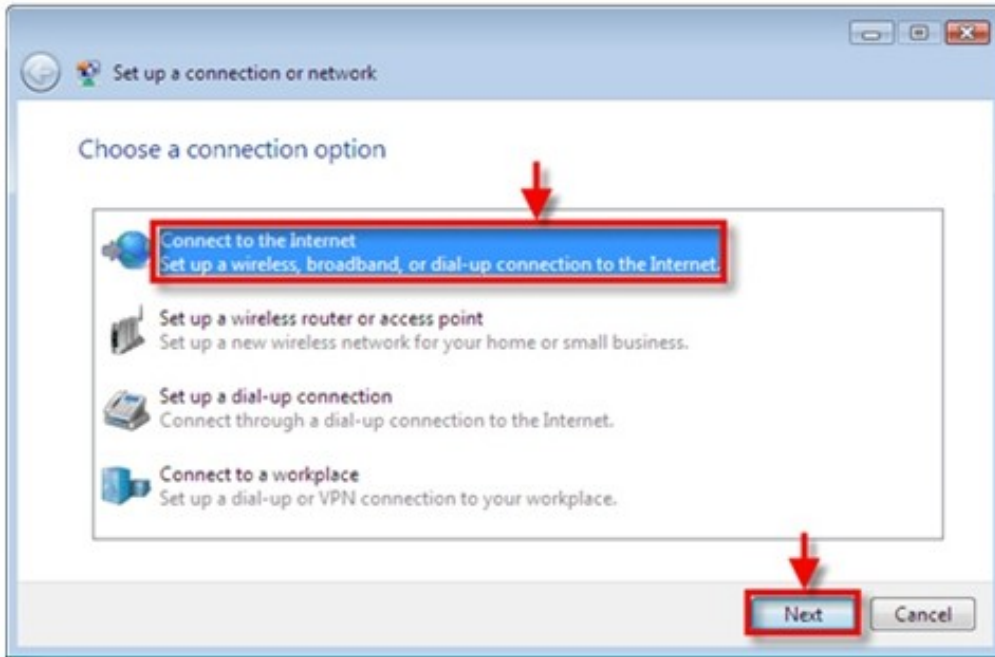

3. Click on Network and Sharing Center icon.

4. Click on Setup a connection or network on the left task pane.

5. A new window will popup asking you to choose the connection option. Click Connect to the Internet and click Next.

6. Now click on Broadband (PPPoE) option.

7. Do the following on this screen:

- Enter the User name and Password your ISP gave you.

username: username@penangfon

password: penangfon

- Type in a name for Connection name. This name is to identify your internet connection. (If you have multiple Internet connections, this is useful).
- If you check the box which says "Allow other people to use this connection", Vista will allow all the users on the computer to access this connection.

8. Click Connect.

Connect to the Internet

Type the information from your Internet service provider (ISP)

User name: example

Password:

Show characters

Remember this password

Connection name: Broadband Connection

Allow other people to use this connection
This option allows anyone with access to this computer to use this connection.

[I don't have an ISP](#)

Connect Cancel

9. If you see the following window then you have successfully established a connection.

10. If you have any issues then you should recheck:
- User name and password.
 - Internet connection settings with your ISP.
